

Intervention from Armenia
(not accounted for on the website)

Thank you. Thank you very much. I took the floor in order to dismiss the allegation of politicising this dialogue. Our delegation did not politicise the dialogue when we were wrongfully accused of occupying and launching aggression against Azerbaijan. We kept our intervention within the realm of minority issues and it is not Armenia's fault that objectives of Azerbaijani policy to ethnically cleanse the Armenian minority from Nagorno-Karabakh and outcome of the launched war were different. Complete destruction of the Armenian monuments, it a clean indication what Azerbaijan may do if their intentions are married with capacities. Fortunately, in some cases small minorities also can stand for themselves and defend their rights from repressive states. As far as we simply called Azerbaijan to look into the international documents to look into CERD and the FCNM; and cooperate with those bodies in order to address minority issues in their country. Thank you.
