Dear President and Honorable members.

Statelessness is a heartfelt topic in the Free Territory of Trieste.

Our true citizenship, is ^{currently} being denied to us and has been illegally replaced with the Italian one, in violations of all international laws.

This imposition, perpetrated by the Italian government that technically makes us stateless is in violation of Article 15 of the Universal Declaration of Human Rights signed December 1948. Our Citizens did not participate in the Italian Republic's choice in the Referendum of June second nineteen forty six after the Italian Fascist party lost the second World War, because they were already destined to become citizens of the Free Territory of Trieste following the Paris agreements.

Thus following these events, the United Nations Security Council, established its own International state, but to this day has failed to protect its own citizens. Today, we find ourselves dominated by a much more powerful state, that without having sovereignty, demands that we pay its public debt this act was prohibited by the 1947 Peace Treaty, and when we refuse, the administering state forcibly steals and then sells our homes and assets!

Now We the People of the Free Territory of Trieste are asking you, in the name of the Universal Declaration of Human Rights, the immediate intervention of the United Nations Security Council as guarantor of the Neutrality, Security, and independence of the Free Territory of Trieste, to step forward and reinstatement to it's agenda the election of the governor of the Free Territory of Trieste.

All this, was foreseen by the United Nations Security Council in its 16th resolution of 1947 and by the 1947 Peace Treaty that, to this day still stands in force!

A striking example, to the rest of the world, of a quick resolution, where YOU can stop US from living as a stateless people!
