Third: the issue of education

There are a lot of negative effects on the displaced people at all levels and the first loss of their homes and their money and the loss of a family member, this instilled in them isolation, frustration and despair of life, where fled and abandonment of more than 400 a thousand Yazidi to displacement camps, "17 camp" in the Kurdistan region of Iraq and one in Syria and 4 in Turkey and this affect negatively on the low level of education from primary to university and leaked a large number of students from the study of the different phases,

Recommendations- :

More international and internationalist and national interest in the Yazidi case and the Yazidi community- :

- 1 -Search for missing Yezidis, especially after the demise if ISIS militarily and the loosing of their areas of influence.
- 2 -Provide assistance to survivors from females / males.
- 3 -Yezidi children recruited by ISIS or their peers who have lived in the camps for five years.

thank you for listening
