

Jemgyyt ferhangi honari magtamguly kalal

Respected President, ladies and gentlemen, the subject of my speech is the need for dialogue and communication between the elites of different minorities on social networks to prevent the spread of hatred against each other.

The majority of countries all over the world are large, nested mosaics of different tribes. This issue is much more in the Middle East, and of course, my country Iran. One after reason for the beauty and power of Iran throughout history is the inclusion and diversity of different linguistic, ethnic, religions, and etc. Identities under the flag of Iran have the creation of [?] and effective civilization in the region and around the world. In the meantime, sometimes due to more mistakes of racial radical identity figures are sometimes due to historical hostile countries. We are revisiting these agreements between different identity groups, especially minorities in social media.

In my opinion, in order to reduce this harm and confront this conspiracy, it is necessary, first of all, to include awareness among different minority groups. And are establishing thanks for elitists and common people about social networks. This issue (video is cut) constitution and responsible institution can reduce the fault and increase the sense of friendship and have in the end cooperation. Thank you so much for hearing me.
