

## **Chairmanship of kermanshah branch cooperation house**

Hello!

Today I want to talk about some social networks in Iran [?] social networks as Instagram and so on. We are actually doing some [?] we have a lot of connections [?]. There is a growing problem on social networks, because our networks and our societies are not so perfect so that's the reason we [?] in Iran, especially teenagers, they spend a lot of time in social media, actually they're obsessed about that, so we cannot control them so easy, but I think we should think about them and our family and our school and university should do something about them.

It was my short summary to talk about [?] so thank you so much for hearing me.
