

Speaker: Please, I am here Sir! Thank you so much Mr. Chairman and delegates and panel. Thanks to the [inaudible] and special thanks to the United States of America for their support through the human rights in this delegation. And not letting the dictator suppress and silence the woman, who are being, unfortunately nowadays, being suppressed in the dictatorship regimes. Mr. Chairman, thanks for your patience with us. If I talk about the United Nations, I think it needs a major and robust system to stick to the title that we have today. Which is the review, rethink and reform. If I rethink the Iranian regime's commitment to human rights and if I rethink about the Ahwazi. [POINT OF ORDER BY IRAN] Thank you Mr. Chairman again and thank you for the United States again for supporting human rights again. I have documented [inaudible] of the Ahwazi high rate and collective death sentence [inaudible]. Where [inaudible] is on the death row and needs attention. Childrenwise, more than 10 children are on the death row because of their participation in recent protests and the Ex-Iranian Minister calls for non-persian children to be expelled from school if they failed the persian test. Random [inaudible], more than 15,000 innocent demonstrators arrested in the recent protest for the [inaudible] rights. Extrajudicial killings in which dozens of Ahwazi killed without any clarification from the government in Iran. Climate Change including building damage are used as weapons against Ahwazi people to forcibly migrate them from their ancestral land. Ahwazi people are asking the United Nations to hold the Iranian occupation regime for all the atrocities against the Ahwaz and calling for their self-determination from the Iranian regime.
