

**Mr. Chairman of the Forum, distinguished attendees,  
Dr. Wagih Raouf is speaking to you in my capacity as  
Executive Director of the European Copts Assosiation in  
Austria.**

**I am speaking to you today directly and in brief, to  
determine the causes of all the crises in the Middle East  
region and the crises that the West suffers from the presence  
of those residing there and those coming from Islamic  
countries.**

**The truth is that the problems of the Middle East, especially  
the problem of the Palestinians with the Jews and the  
suffering of Christians in the Middle East and all Arab  
countries, are confined to political Islam, which carries within  
it all meanings of hostility to everyone who does not hold the  
Islamic religion.**

**The West's also suffering from terrorism as a result from the  
spread of political Islam.**

**Some Western countries have previously helped spread the  
teachings of political Islam, and today they are paying the  
price.**

**In order to define the problem and develop ways to treat it,  
we must determine its source.**

**The source of this terrorism is the teachings of political Islam  
which take place at Al-Azhar University in Egypt and in their  
branches in other countries.**

**This university accepts students from all over the world and**

**does not accept any Christian or any person who does not hold the Islamic religion to study there.**

**This university graduates sheikhs, engineers, teachers, doctors, judges, etc..**

**It teaches them Islamic jurisprudence in addition to these specialized sciences, so that they graduated to being, in addition to their jobs, also an Islamic preacher who carries the exclusionary thought of others.**

**You can imagine, that they teach their students, from the primary stage to the university level, books and teachings that permit the rape of Hostages, their killing, the eating of their flesh, and also permit the eating of Hostageschildren.**

**By the way, this university is funded by several billion annually, from the state budget, from taxes to which Christians contribute, and also from foreign aid, which Egypt receives from Western and Eastern countries. This means that Western countries also indirectly contribute to finance this type of education that supports terrorism.**

**Ladies and Gentlemen, when you want to stop the bloodshed, you must combat those who produce terrorists throughout the days and years for future generations.**

**If you want to stop the bloodshed, you must close the source.**

**Thanks for your listening.**

**Dr. Wagih Raouf**
