

## European Center for Sri Lankan Community

The independence of India's judiciary has encountered increasing challenges under the leadership of Prime Minister Narendra Modi. The dismissal of judicial autonomy has sparked crucial concerns regarding the separation of powers, transparency, and the rule of law in the largest democracy globally. Given the current track record of the Bharatiya Janata Party Regime, it appears to lack the political will to implement a comprehensive roadmap for the betterment of Indian Muslims. In the pursuit of inclusivity, we must recognize the pivotal role of education, state funding tied to admission criteria that consider the diversity of communities can be catalyst for change. Teachers training programme that sensitize educators to the unique needs of marginalized communities. Efforts to enhance infrastructure provisions are paramount, basic amenities such as school's health facilities and sanitation services should be accessible to all, regardless of their religious or their ethnic background. By embracing these strategies, we can collectively build a nation where diversity is celebrated, and every citizen, irrespective of their background, enjoys equal opportunities for growth and prosperity. European Center for Sri Lankan Community, we thank you for the opportunity.
