

Balochistan United Front- Human Rights Group – Iran

Thank you, Chairman, and President, and the other fellow colleagues.

I am from Balochistan United Front Human Rights Group. My name is Jamshid Amiri (?).

The systematic historic and inequality has greatly damaged and limited the Baloch people in making any form of meaningful public participation in access to improvement, education, health, property development, ownership, housing, social welfare, media and cultural life, all of which make the basic human rights for all human life across the world.

When discussing this improvement opportunity of youth Baloch people, it is essential that we must raise the issue of the recent project put forward by the Islamic Republic of Iran. Referred to as the development of Balochistan coastal area, the project, since its establishment, had employed non-Baloch people to this specific coastal region, providing them with the land and resources which belong to Balochistan people. It is putting young Baloch people at disadvantage, and have therefore no career to implement opportunities in order to enable them to build up their future. Under the pretext of the unsustainable development on the shore of Abu Jazan, which is called Makron Shore, or coastal area, that starts from the Strait of Hormuz to the border of Pakistan. This will be the Iranian government interest to train youth Baluch students and provide jobs instead of engineering, migration, or non-Baluch in the Makran coastal area. Chabahar coastal area have great opportunity for the neighboring country and the international community to develop business, but without using Biyut (?) Baloch people, it will be anti-Baloch project.

Indeed, a population migration plan...(cut off by chair)
