

PM Romania

Thank you, Ms. Moderator. It is a privilege to address to you. Romanian institutions during the last couple of years have conducted some important projects related to the sensibilization of journalists towards minorities and minorities issues, as well as some concrete steps were taken against hate speech on the public field.

I believe that these projects will be continued and we will take our focus for the next couple of years to follow, to take some more concrete actions on this respect. I strongly encourage the NGOs represented here today on the behalf of the Hungarian community as well as other minorities from Romania to continue to address their concerns to the specific institutions of Romania, namely the National Council for Combating Discrimination. And on my (?) behalf I will urge other competent authorities to take further steps against such cases, but also some concrete actions to prevent such situations.
